**DETAILED ACTION**

***Election/Restrictions***

1. Newly submitted claims 14-24 ARE directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Species I: claims 9-11 and 13;

Species II: claims 14-24.

The species are independent or distinct because in species I, the mesh unit as well as the mesh frame separately have two-layered structure each comprising PET and metal foils whereas in species II both the mesh unit and the mesh frame are formed integrally together by a base film, which as PET and metal foils.

2. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 14-24 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

**EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Jeffrey J. Lotspeich on June 05, 2006.

The application has been amended as follows:

Claims 14-24 have been canceled.

***Allowable Subject Matter***

4. Claims 9-11 and 13 are allowed.
5. The following is an examiner's statement of reasons for allowance:
6. The prior arts of record do not anticipate or render obvious to one skilled in the art an EMI shielding film of a front panel display device comprising various elements as claimed, more specifically a mesh unit formed of conductive meshes and a mesh frame surrounding the mesh unit, the mesh frame having a two-layered structure comprised of PET (polyethylene terephthalate) and metal foils.
7. The closest reference US 2004/0074655 discloses an EMI shielding film of a front panel display device comprising a mesh unit formed of conductive meshes and a mesh frame surrounding the mesh unit. USPAT 6,428,587 and US 2002/0033661 are related to a flat panel display device wherein the mesh unit formed by patterning a two-layered base film comprised of PET and metal foils. However, none of the prior arts alone or in combination with any other prior art references teach or suggest forming a mesh frame that surround the mesh unit to have a two-layered structure comprising PET and metal foils.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
